RAMBLINGS

SOUTHEASTERN COMMUNITY
COLLEGE

1976
RAMBLINGS

WHITEVILLE, NORTH CAROLINA

President

Generically, a "college" is a company of persons having a common purpose or common duties. We have let the term develop over the years to mean the common purpose of learning at a "higher education" level. More recently our community colleges have developed a concept of community-wide, open-door learning opportunities not only at the higher education level, but at the level of the needs of the adult citizens of all ages and levels. What an outstanding example of developing civilization of man! Education on multi-levels and for all citizens at moderate cost!

You are wise to take part in this movement. Over 30% of all enrollment in post-secondary institutions in this country is now enrolled in community colleges. It's the wave of the present and of the future. If you are a student, we would like to say congratulations for becoming a part of our educational family. If you are a prospective student, we would like to say come and try the SCC experience — whether a course or a full curriculum. We have a faculty and staff who are committed to making SCC one of the most meaningful experiences of your life. We are a "company of persons having a common purpose or common duties" — that purpose and duty is your educational development.

Dedication

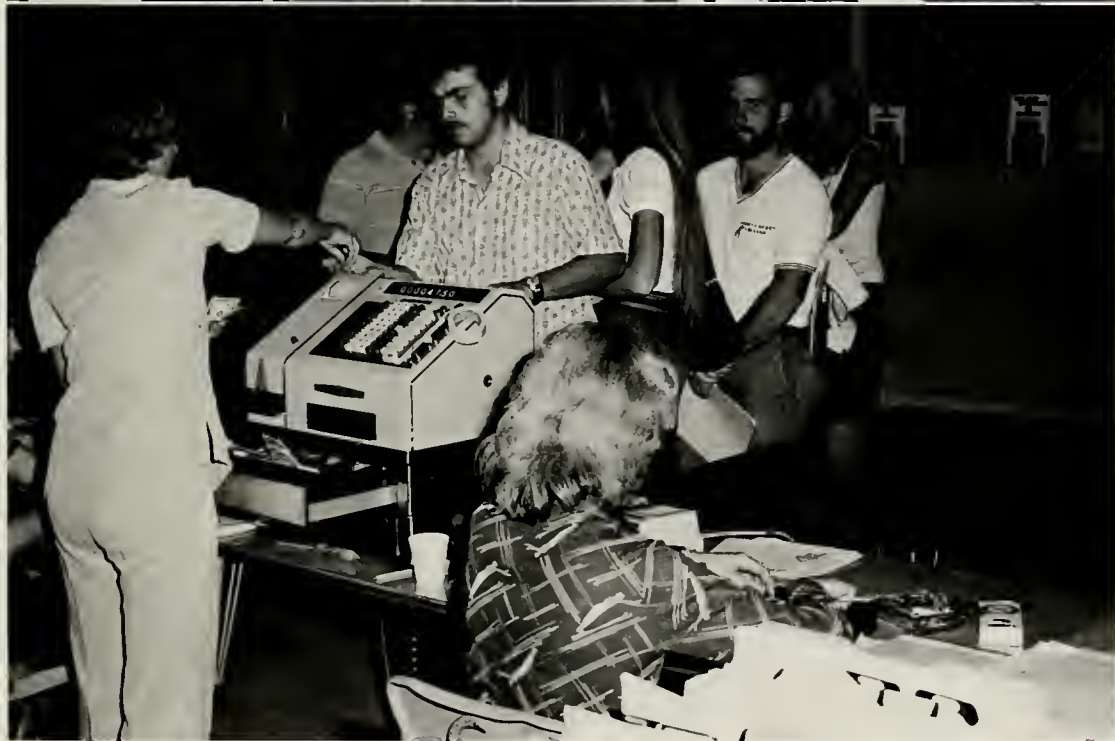

In dedicating the 1975-76 Ramblings to Becky Marlin, we want to express our gratitude for her efforts above and beyond the call of duty. It is rare to find someone willing to give so much of their time to students and staff. In recognition of her unique contribution to SCC, we dedicate this yearbook to Becky Marlin.
